## Education

### Sarah Lawrence College

I studied at SLC for three years, focussing on communication, design, and technology. I am especially interested in the history and craft of typography and book layout, and the influence of technological developments on the way we use and present language.

## Web Designer

2009–

### Reason Media Group

I am responsible for front-end design and development in HTML, CSS, and jQuery, with an emphasis on readability, maintainability, usability, and performance.

## Co-Founder

2008–2009

### Feeeedback

I worked with a partner to build a music website, pulling songs from music blogs.

## Managing Director

2007–2008

### Sadie Lou, Student Magazine and Website

As Managing Director, I was responsible for overseeing the design of the website, and managed the editorial workflow, overseeing a 12-person editorial team.

## Research Assistant

2006

### Dan King, Mathematics professor

We studied the mathematical concepts explored in the writings of Argentine writer Jorge-Luis Borges, in preparation for a course Dan taught on the subject the following year.

## Founding Director

2006

### Sadie Lou, Student Website

In 2006, I established Sarah Lawrence College's student-run website, building the site from scratch, attaining funding, and hiring three other managers.

## Design Editor

2005–2006

### The Phoenix, Student Newspaper

I crafted a clean new design for the paper and implemented design standards, overseeing proper layout and typography for each issue. I also built a new website for the paper.

## Resident Advisor

2005–2006

### Sarah Lawrence College Residence Life

I served as Resident Advisor on one of the busiest freshman halls on campus.

## Web Developer

2005

### Information Systems, Sarah Lawrence College

I developed the information architecture for a new student evaluations system, and performed extensive research into web standards and content management systems.

## Skills

Fluent with CSS, HTML, InDesign

Proficient with PHP, Python, Javascript, jQuery, Photoshop, Illustrator, Git

Familiar with Java, C, Django, Subversion

## Other

Strong language and people skills

Background in puppetry (especially marionette and toy theatre)

Experience with collaborative creative processes
